

TIDAL Audio Contriva G3 Loudspeaker *New!*

\$79,000

TIDAL Audio Contros Digital Controller

\$60,000

"Driven by a Tidal Contros digital source/preamplifier and Intra power amplifier, the Contriva was rich and detailed without being analytical. Its build and finish quality, like that of all Tidal products, was extraordinary. Exquisite look, exquisite sound."

(Robert Harley, *The Absolute Sound*, June 2023 Show Report)

"This system - the TIDAL Audio Contriva G3 loudspeakers, Contros controller, Intra amplifier and all the TIDAL cables - would still win my Best Sound of Show." (Marc Phillips, PTA - HIGHEND '23 Show Report)

"...Tidal Contriva G3 played a Red Book stream of Yosi Horikawa's 'Bubbles' that sounded extremely fluid.... Yo-Yo Ma's cello, on his performance of Bach's Suite No.1 in G Major for Unaccompanied Cello, sounded extremely convincing with correct tonal balance."

- Jason Serinus / Stereophile

TIDAL Audio Intra Stereo Amplifier

\$28,000

"For astute listeners who demand the utmost in neutrality and transparency in a high-power amp without any sacrifice in musicality and emotional engagement - who don't like the notion of a pair of 150-pound monsters that may or may not have a zillion tubes, and can't or won't part with six figures for amps, the TIDAL Audio Intra is your amp. Highly recommended!" - Dave McNair / PartTimeAudiophile.

Siltech Ruby Crown Cables *New!*

(price varies)

Celebrating 40 years of excellence. This new series is the least expensive route to Siltech's finest ever metallurgy, the newest S10 monocrystal silver conductors which have been specially configured in a 3- or 4-core design tailored for this application, with high-grade connectors to further improve performance.

Equitech 2RQ - Balanced Power

\$6,990

The Equitech Model 2RQ is the company's flagship unit, supplying you with the best-performing Balanced Power system available. Similar to balanced audio, balanced power conditioners like the Equitech Model 2RQ employ common-mode rejection to cancel unwanted noise.

Ictra Design Proto Rack

\$25,000

"After spending a solid couple of months up close and personal with it here in my listening room, I can assure you that the PROTO makes real sonic sense. The technology, design, and implementation are second to none, and it really shows." - John Richardson / PartTimeAudiophile

Supporting Cast:

SILENT ANGEL

"Hearing Doug's excellent all-Tidal demos (including speakers) at shows piqued my interest in the brand. I'm glad that I took on this review; the Prisma and Ferios, individually and together, turned out to be outstanding, possessing some extraordinary qualities."

~ Robret Harley, The Absolute Sound Issue 306 July/August 2020
